## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 23 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glackin (US5082595).

Glackin discloses a carbon flexible heating structure formed by mixing silicon rubber with carbon black at a weight in the range of 100:1-15 and curing the mixture wherein the carbon flexible heating structure is reinforced with short staples, and adding a diluent for insulation (column 5, line 47-column 6, line 64). Glackin does not disclose the diameter of the short staple between 1-50 micrometers. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included a short staple with a diameter between 1-50 micrometers as a matter of design choice

### ***Allowable Subject Matter***

3. Claims 24-25, and 29-31 are allowed.
